

Anexo 5: Manual de instalación ActiveMQ

Descarga

```
hduser@wilson-VirtualBox:~$ wget
```

```
http://apache.osuosl.org/activemq/5.10.0/apache-activemq-5.10.0-bin.tar.gz
```

Descompresión

```
hduser@wilson-VirtualBox:/usr/local$ sudo tar -xzf apache-activemq-5.10.0-bin.tar.gz -C /usr/local/
```

```
hduser@wilson-VirtualBox:~$ cd /usr/local/
```

Creación de symlink

```
hduser@wilson-VirtualBox:/usr/local$ sudo ln -s apache-activemq-5.10.0/ activemq
```

```
hduser@wilson-VirtualBox:/usr/local$ sudo chown -R hduser:hadoop apache-activemq-5.10.0/
```

```
hduser@wilson-VirtualBox:/usr/local$ sudo chown -R hduser:hadoop activemq
```

```
hduser@wilson-VirtualBox:/usr/local/activemq/bin$ cd ~
```

Creación de variables de entorno

```
hduser@wilson-VirtualBox:~$ nano .bashrc
```

```
#ActiveMQ
```

```
export ACTIVEMQ_HOME=/usr/local/activemq
```

```
export PATH=$PATH:$ACTIVEMQ_HOME/bin
```

Cerrar la consola y volver a ingresar

```
hduser@wilson-VirtualBox:~$ activemq -version
```

```
hduser@wilson-VirtualBox:~$ activemq start
```

Para ver el estado del ActiveMQ

```
hduser@wilson-VirtualBox:~$ activemq status
```

Entrar a la consola a la dirección

```
http://localhost:8161/admin/
```

```
user: admin
```

```
password: admin
```

Para parar el servicio

```
hduser@wilson-VirtualBox:~$ activemq stop
```
